

Return On Investment

Investments in Electronic Document Management Software (EDMS) by leading companies have resulted in a phenomenal return on investment. In fact, Nucleus Research, an independent research firm specializing in measuring the ROI of IT investments, recently reported that 83% of companies surveyed reported a positive ROI on their investment in EDMS applications. That's a much higher percentage than can be found with virtually any other IT investment!

It's just one reason that Gartner Research puts Document Management applications squarely in their magic quadrant of tools with high ROI and low cost of ownership. Samhita® Document Manager can easily pay for itself in just weeks given the increased ability for users to locate the information they need.

Productivity gains are only part of the big picture. Samhita® Document Manager also saves you money by centralizing and managing a function typically spread over countless applications and systems.

Finally, there's the very real value associated with your peace of mind -- knowing that all of your precious digital assets and corporate know-how, are centralized, secured, versioned, and instantly recoverable.
